

FOR IMMEDIATE RELEASE

L.B. Bohle Spotlights New U.S. Service Center Capabilities and Continuous Processing Expertise at INTERPHEX 2011

See the BFS 3 fluid bed system for pharmaceutical drying at booth 2617

WARMINSTER, Pa. (March 14, 2011) — L.B. Bohle, a leading manufacturer of high-efficiency pharmaceutical processing and handling equipment, will showcase the capabilities of its new U.S. Service Center, as well as its continuous processing expertise, at INTERPHEX 2011. The company will also display its BFS 3 fluid bed system at Booth 2617, March 29-31 at the Javits Center, New York.

At INTERPHEX attendees will have an opportunity to learn about Bohle's U.S. Service center, which opened in September 2010. The 2,000 square-foot facility, located outside of Philadelphia, offers pharmaceutical processing expertise and equipment support including: equipment demos and product run simulations; tablet coating solutions; process development and optimization; and seminars with industry experts.

Bohle's processing experts will be available to discuss continuous processing in granulation, drying and coating at INTERPHEX. Continuous processing significantly reduces production costs, minimizes intermediate storage and avoids costly in-process controls. Bohle's experts will discuss how improvements in equipment and processes will move pharmaceutical manufacturers closer to achieving these goals.

In addition, Bohle will display its BFS 3 fluid bed system at INTERPHEX. The BFS 3 is suitable for drying, granulation, layering and coating applications. Its tangential technology supports faster, more uniform coverage, shortening processing times. The integrated tangential flow bottom eliminates the need to remove the product bowl for discharging.

For more information about L.B. Bohle or to schedule an interview with one of the company's pharmaceutical processing experts at INTERPHEX 2011, contact Debra Yemenijian at debray@schubert.com or 610-269-2100, ext. 224.

About L.B. Bohle LLC

L.B. Bohle LLC, the U.S. subsidiary of L.B. Bohle Maschinen & Verfahren GmbH, provides high-efficiency processing technologies benefitting the pharmaceutical and nutraceutical markets, including tablet coating, milling, granulating, blending, material handling and weighing equipment. With 30 years experience and more than 35 patents worldwide, L.B. Bohle continues to develop innovative technologies which meet the challenges of the pharmaceutical industry, making the company one of the world's

leading manufacturers of pharmaceutical processing equipment. For more information, visit www.lbbohle.com or call (215) 957-1240.
