

**FOR IMMEDIATE RELEASE**

**L.B. Bohle to Expand Production Facility for Pharmaceutical Handling Equipment**

**SASSENBERG, Germany** (May 31, 2011) — L.B. Bohle has started construction on the expansion of its offices in Sassenberg, Germany. The new addition, set to open in October 2011, will include a new manufacturing facility for Bohle’s pharmaceutical handling equipment line, as well as new offices for engineers and technicians.

“This investment will enhance operations at the Sassenberg facility,” said Lorenz Bohle, chief executive officer. “Starting in October, Bohle’s full range of pharmaceutical handling equipment will be produced in Sassenberg and exported throughout the world.”

The production facility will be expanded by 1,600 square meters, more than doubling Bohle’s existing manufacturing space at the site. Additionally, another new building will house workspaces for up to 12 engineers and technicians.

Bohle’s line of pharmaceutical handling equipment includes lifting, blending, sieving and milling systems such as the HS Hoist, the PM Blender, the BTS Turbo Sieve and the BTM Turbo Mill. For more information, visit [www.lbbohle.com](http://www.lbbohle.com).

**About L.B. Bohle LLC**

L.B. Bohle LLC, the U.S. subsidiary of L.B. Bohle Maschinen & Verfahren GmbH, provides high-efficiency processing technologies benefitting the pharmaceutical and nutraceutical markets, including tablet coating, milling, granulating, blending, material handling and weighing equipment. With 30 years experience and more than 35 patents worldwide, L.B. Bohle continues to develop innovative technologies which meet the challenges of the pharmaceutical industry, making the company one of the world’s leading manufacturers of pharmaceutical processing equipment.
